PERSONAL STATEMENT

Software Engineer with hands-on experience building scalable web applications, Python backends and AI-focused software using React, modern JavaScript and Python across professional and freelance work. Built a CRM platform and a desktop AI assistant, with a strong interest in developing production-ready AI systems and agentic workflows. First Class Honours BSc in Computer Science, focused on clean code, API integration, SQL databases and end-to-end product delivery.

PROFESSIONAL EXPERIENCE

Frontend Developer

One Stop Stores Ltd, Brixton, London (On-site) | Part-time | 2024 - Present

- Wrote Python scripts to automate data processing and repetitive tasks, cutting manual processing time by **15%** and freeing up engineering time for higher-value work.
- Built reusable, maintainable React components adopted across multiple product areas, reducing development time on new features by **14%**.
- Troubleshoot and resolved frontend performance and usability issues, reducing recurring bug reports by **25%** and maintaining a smoother experience across devices and browsers.
- Integrated REST APIs and third-party backend services using Python and JavaScript, connecting frontend experiences to server-side data sources.
- Collaborated with designers and backend developers in an agile team to validate product hypotheses quickly and iterate towards high-quality, user-friendly solutions.

Freelance AI Agent & Software Developer

Self-Employed | 2024 - Present

- Build custom software and AI-focused applications using Python and React, including a desktop AI assistant and client-facing software solutions.
- Deliver software solutions end-to-end, from requirements gathering and system design through implementation, testing and deployment, taking ownership from initial concept to working application.

Web Developer

DSP Construction Ltd, Greater London (Hybrid) | Part-time | 2023 - 2025

- Automated data entry and content workflows using Python scripting, reducing manual processing time by **30%**.
- Improved accuracy of content and reporting workflows by **25%** through automation and structured quality checks.
- Developed and maintained enterprise web applications using React, JavaScript and Python, ensuring clean, readable and maintainable codebases across multiple platforms.
- Collaborated with UI/UX designers to translate design concepts into responsive, polished interfaces, holding a high bar for how finished features both work and look.

Cable Management and Network Technician

Middlesex University, London | Part-time | 2022 - 2023

- Developed Python scripts to automate network monitoring and reporting, reducing diagnostic time by **10%** and improving network uptime visibility by **15%**.
- Maintained and organised network infrastructure at scale, applying structured problem-solving and attention to maintainability across complex technical environments.

PERSONAL PROJECTS

Storage CRM Platform — AI Integration In Progress

- Built a CRM platform for managing storage-related business workflows with a React frontend, Python backend and PostgreSQL database; currently implementing AI capabilities to improve search, workflow assistance and user interaction.

Desktop AI Assistant

Built a Python-based desktop AI assistant with voice interaction and assistant-style workflows, demonstrating hands-on experience developing AI-enabled software.

FIFA 2026 Live Scores — github.com/subanan18/fifa-2026-live-scores

- Built a live sports score web application using React, JavaScript and a real-time data API, demonstrating frontend-to-API integration and asynchronous data handling.

BTS Fan Site — github.com/subanan18/BTS

- Developed a responsive content site using React.js, structuring reusable components, scalable page layouts and clean, maintainable code throughout.

Personal Portfolio Site — subanan18.github.io

- Designed and built a personal portfolio using HTML, CSS, JavaScript and Python-based tooling, showcasing end-to-end delivery of a production-ready digital product.

SKILLS

Languages: JavaScript (ES6+), Python, HTML5, CSS3, Java, PHP

Frontend Frameworks: React.js, Tailwind CSS, Bootstrap; working knowledge of Angular, Vue.js and React Native

Backend and Databases: Python, FastAPI, Node.js, REST APIs, MySQL, PostgreSQL; Django and GraphQL (learning)

Testing: Jest, Cypress, JUnit, Mockito (unit and automation testing)

AI and Developer Tools: AI assistants, AI APIs, prompt engineering, agentic AI concepts, AI-assisted development workflows

Tools and Practices: Git/GitHub, Figma, Agile/Scrum, modular UI architecture, UI/UX design

EDUCATION

BSc (Hons) Computer Science — First Class Honours

Middlesex University, London | 2021 - 2024

Key module grades: Enterprise Networking and Automation 90%, Web Applications and Databases 86%, Undergraduate Individual Project 81%, Testing and Verification 74%

A Levels: Biology, Physics, Chemistry — Royal College, Colombo | 2017 - 2020

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900)
- Figma Essential Training (UI/UX Design)
- PCEP – Certified Entry-Level Python Programmer (Python Institute)
